

Our Process

All electronic waste material, and metals, received by [TelcoScrap](http://www.telcoscrap.com) is sorted, staged, and tested for functional reuse, refurbished and resold back to the marketplace.

Material that is determined to be eScrap is broken down and sold to buyers or dealers in need of specific raw commodities, scrap, or precious metals.

Hard Drives from PC's™, Servers, and Laptops are destroyed and certification of destruction is provided.

TV's™, Fluorescent bulbs, and CRT's™ are channeled to our downstream partners who specialize in the recycling, and processing of that material in accordance with State, Local, Federal, and ISO 9000 guidelines.

TelcoScrap recycles the following Telecom/IT equipment
